DELIVERY CAN BE ARRANGED

Irish Maths Test

An Irishman wants a job, but the foreman won't hire him until he passes a little math test. Here is your first question, the foreman said. "Without using numbers, represent the number 9."

"Without numbers?" The Irishman says? "Dat is easy." And proceeds to draw three trees.

What's this?" the boss asks. "Have you ain't got no brain? Tree and tree plus tree makes 9" says the Irishman. "Fair enough," says the boss. "Here's your second question. Use the same rules, but this time the number is 99." The Irishman stares into space for a while, then picks up the picture that he has just drawn and makes a smudge on each tree... "Ere you go."

The boss scratches his head and says, "How on earth do you get that to represent 99?" "Each of da trees is dirty now. So, it's dirty tree, and dirty tree, plus dirty tree. Dat makes 99." The boss is getting worried that he's going to actually have to hire this Irishman, so he says, "All right, last question. Same rules again, but represent the number 100." The Irishman stares into space some more, then he picks up the picture again and makes a little mark at the base of each tree and says, "Ere you go. One hundred."

The boss looks at the attempt. "You must be nuts if you think that represents a hundred!" The Irishman leans forward and points to the marks at the base of each tree and whispers, "A little dog come along and poop by each tree. So now you got dirty tree and a turd, dirty tree and a turd, and dirty tree and a turd, which makes ONE HUNDRED!"

DONNYBROOK FARM SERVICE

MARCH 2014

PASTURE SEED NOW AVAILABLE

180 SOUTH WEST HIGHWAY
DONNYBROOK WA 6239
PH: (08) 97 311 101
FAX: (08) 97 311 777

RE-VAMP THE POOR PASTURE AND PROFIT

What a kind summer we have had for standing pasture in the Donnybrook shire area with little rain to reduce the quality of dry feed. The hot weather is another question, but everything cannot be perfect. It is very encouraging for primary producers that the prices for cattle and fat lambs has risen substantially, giving reason for some optimism to keep on farming.

If you are considering some pasture improvement, Glenn and John at Donnybrook Farm Service may be able to assist. Good information has been collected from the pasture comparison trials we have been involved with over the past two years.

Nine different rye grasses were compared last year plus four blends of pasture. In 2012 we ran similar comparisons on another property and some encouraging results have been made. Yield from the hay cut has been very good and our farmer friends who co-operated in having the plots on their land report they are delighted with the palatability of the stored hay - well at least the cattle are keen to eat it.

Donnybrook Farm Service are appointed wholesale agents for Lubrimaxx oils and lubricants.

Take advantage of our wholesale buying price.

TRANSPORTATION OF GAS AND CHEMICALS IN VEHICLES

Cartage of household gas and chemicals is a potentially hazardous job. A couple of points to make all our lives a little easier:

- 45kg household gas bottles have to stand upright in an open vehicle for transport when full.
- Only 9kg gas bottles are permitted to travel in the boot of a car. No 15kg or 18kg forklift bottles in the boot.
- ALL CHEMICALS must travel in the back of ute. It is illegal for us to load chemicals into a car. We never want to see a crash happen with dangerous chemicals in the car cab.
- Utes and trucks must be registered for the legal weight being loaded. New laws have been implemented that carry substantial fines for overloading and loads not properly secured.

Please help us to help you by not pushing the boundaries.

PeKacid 0-26-17

PeKacid is a solid phosphoric acid in dry form specially tailed for fertigation.

PeKacid is chloride and sodium free, fully water soluble and practically free from impurities and residues

See the enclosed flyer for more information
