A man was walking down the street when he was accosted by a particularly dirty and shabby looking homeless man who asked him for a couple of dollars for dinner.

The man took out his wallet, extracted ten dollars and asked, "If I give you this money, will you buy some beer with it instead of dinner?" "No, I had to stop drinking years ago," the homeless man replied.

"Will you spend this on green fees at a golf course instead of food?" the man asked. "Are you NUTS!" replied the homeless man. "I haven't played golf in 20 years!" "Well," said the man, "I'm not going to give you money. Instead, I'm going to take you home for a hot shower and a terrific dinner cooked by my wife."

The homeless man was astounded. "Won't your wife be furious with you for doing that?" The man replied, "That's okay. It's important for her to see what a man looks like after he has given up drinking and golf."

CHATEAU®

HERBICIDE SW

Chateau Herbicide for Weed Control

Chateau is a new herbicide to give long term weed control in vineyards.

Chateau has been proven in the USA and Europe for many years in tree crops and vines and is very effective against a wide range of weeds. Currently it only registered for vineyards in Australia, but an extension of the label will occur next year.

Chateau is a pre-emergent and relies upon the ground not being disturbed after application. Application of Chateau has to be onto wet, weed-free ground and it needs to be washed in over the next 3 weeks. This can be achieved with irrigation. Perfect timing for application is in August or September when winter rainfall is still occurring.

The barrier Chateau provides will give weed control from 4 to 8 months. With such long term control it will save a number of herbicide applications.
